

## Brazil

### Annual Observance Report of the Special Data Dissemination Standard for 2007

#### I. INTRODUCTION

1. The IMF's work on data dissemination standards began in October 1995, when the Interim Committee (now the International Monetary and Financial Committee) endorsed the establishment by the IMF of standards to guide members in the dissemination to the public of their economic and financial data. The standards were to consist of two tiers: the Special Data Dissemination Standard (SDDS) to guide countries that have, or that might seek, access to international capital markets, and the General Data Dissemination System (GDDS) to assist all other member countries. The IMF Executive Board approved the SDDS in March 1996, and has since conducted periodic reviews of the SDDS, making changes to maintain relevance as developments warrant. The Executive Board authorized annual reports of subscribers' observance of their SDDS undertakings in March 1999 after the Second Review of the Special Data Dissemination Standard, which also implemented a new requirement that subscribing countries disseminate a data template on international reserves and foreign currency liquidity.
2. This observance report follows in three additional parts. Part II summarizes a subscriber's SDDS undertakings. Part III reviews the subscribing country's observance of SDDS requirements during the reference year, and Part IV provides information, as available, on the quality of the subscriber's statistical processes for compiling and disseminating the data.

#### II. SDDS UNDERTAKINGS

3. In subscribing to the SDDS, countries undertake several measures to document their data dissemination practices to the international public. This report covers observance of SDDS undertakings. It follows the legal text governing the SDDS, contained in the Annex to the text of the founding 1996 Executive Board decision.<sup>1</sup> The Annex refers to the four metadata dimensions (Data, Access by the Public, Integrity, and Quality) of the SDDS and to the Dissemination Standards Bulletin Board (DSBB):
4. Under the Data dimension (Sections II.1 and III.3 of the Annex):
  - **Coverage:** Subject to the applicable "as relevant" coverage flexibility options allowed by the SDDS and exercised by the subscriber, subscribers must disseminate to the public

---

<sup>1</sup> Posted on the internet at <http://www.imf.org/external/pubs/ft/sd/index.asp?decision=EBM/96/36>

all prescribed components of all prescribed data categories.<sup>2</sup> The report takes special note of the subscriber's coverage of the prescribed components for the data template on international reserves and foreign currency liquidity (reserves template) and for external debt.

- **Periodicity:** Subject to the periodicity flexibility options allowed by the SDDS and exercised by the subscriber, subscribers must release all prescribed components of all prescribed data categories with at least the prescribed periodicity. The report takes special note of the subscriber's observance of the periodicity requirements for the reserves template and for external debt.
- **Timeliness:** Subject to the timeliness flexibility options allowed by the SDDS and exercised by the subscriber, subscribers must release all prescribed components of all prescribed data categories with at least the prescribed timeliness. The report takes special note of the subscriber's observance of the timeliness requirements for the reserves template and for external debt. *All timeliness information in this report is based on release dates detected from the national summary data page (see below) that the subscriber maintains.*

5. Under the **Access by the Public** dimension (Sections II.2 and III.3 of the Annex):

- **Advance release calendar (ARC):** Subscribers must disseminate an ARC for all prescribed components of all prescribed data categories (subject to the “as relevant” coverage flexibility options allowed by the SDDS and exercised by the subscriber, and data released with daily frequency), whether or not periodicity or timeliness flexibility options are taken, at least three months in advance of release.
  - ARCs are to be reported to the IMF covering a future period from three months to one year, with a frequency sufficient to provide release dates at least three calendar months in advance of the current date.
  - ARCs may be revised after dissemination but should provide the date of data release no later than the Friday preceding the day of release.
  - ARCs must be reported in an electronic format the IMF determines.
  - This report refers to timeliness against the ARC as “punctuality” to distinguish it from timeliness against SDDS requirements. *All punctuality information in this*

---

<sup>2</sup> “As relevant” coverage flexibility may be available to a subscriber, subject to IMF staff approval, for components of the following categories:

Production index: Breakdowns by industrial, primary commodity, or sector, as relevant.

Labor market: Employment, unemployment, and wages/earnings, as relevant.

Central government debt: Breakdowns by domestic and foreign holders, as relevant, with a breakdown by currency (including indexed), as relevant, and a breakdown by maturity; debt guaranteed by central government, as relevant.

Stock market: Share price index, as relevant.

Exchange rates: Spot rates and three- and six-month forward market rates, as relevant.

*report is based on release dates detected from the national summary data page (see below) that the subscriber maintains and the ARC the subscriber reports to the IMF.*

6. Under the **DSBB** (Section III.2 of the Annex):

- **National summary data page (NSDP):** Subscribers must post a table on a national webpage to which the DSBB is linked containing for all prescribed components of all prescribed data categories (subject to coverage flexibility options allowed by the SDDS and exercised by the subscriber) the reference period of the latest release and the value of the latest and most recent previous releases.
- NSDPs must follow format and layout requirements determined by the IMF that allow the staff to detect releases by electronically scanning the NSDP.
- Among these electronic monitoring requirements, for the prescribed data template on international reserves and foreign currency liquidity, as well as the table on external debt, the NSDP may link to another electronic document containing a table with the prescribed components; however, the NSDP must contain the reference period of the table that contains the current release and is the target of such a link.

7. Under the Integrity Dimension (Section III.2 of the Annex):

- **Metadata certification:** Every calendar quarter, subscribers must certify that the information posted on the DSBB is correct within three (local and IMF) working days after the end of the quarter, and update metadata the subscriber deems incorrect at the certification time within an additional five (local and IMF) working days of the end of the quarter. The metadata posted on the DSBB include,
  - The ARC.
  - Descriptions of compilation and dissemination practices for the Data, Access by the Public, Integrity, and Quality dimensions, as well as the six aspects Summary Methodology, for each data category the SDDS prescribes, subject to any “as relevant” coverage flexibility options allowed by the SDDS and exercised by the subscriber.
  - User contact and data release formats information.

8. In making an overall assessment whether a subscriber is in observance of the SDDS, staff will follow a graduated approach that distinguishes between minor and serious deviations from a subscriber’s SDDS undertakings.

### III. OBSERVANCE OF THE SDDS BY BRAZIL DURING 2007

9. Brazil subscribed to the SDDS on March 14, 2001 and met all SDDS requirements at the time of subscription. The Summary of Observance table<sup>3</sup> on the DSBB shows Brazil's dissemination policy concerning periodicity and timeliness of SDDS prescribed data categories and their components, as well as the flexibility options allowed under the SDDS that it has exercised, if any. According to the Summary of Observance, these policies have been in observance of the SDDS since the time of subscription. The following sections review Brazil's dissemination practices against SDDS requirements in 2007.

#### A. Data Dimension Undertakings

##### Coverage

10. Brazil took no "as relevant" coverage flexibility options.
11. During 2007, Brazil met the SDDS requirements for coverage for all data categories.

##### *Reserves template*

Brazil disseminated all the prescribed components for the reserves template.

##### *External debt*

Brazil disseminated all the prescribed components for the external debt template.

##### Periodicity

12. As shown on the Summary of Observance at <http://dsbb.imf.org/Applications/web/sddsctycatsoolist?strcode=BRA>, Brazil did not use flexibility options for periodicity.
13. Brazil exceeded the SDDS periodicity requirements for<sup>4</sup>
- Labor market: Employment
  - Labor market: Unemployment
  - Labor market: Wages/Earnings
  - Central government debt
  - Balance of payments
  - International investment position
14. During 2007, Brazil met the SDDS periodicity requirements for all data categories.

---

<sup>3</sup><http://dsbb.imf.org/Applications/web/sddsctycatsoolist?strcode=BRA>

<sup>4</sup> Exceeds means that Brazil announced a dissemination period that is more frequent than the one prescribed by the SDDS.

### *Reserves template*

Brazil met the SDDS monthly periodicity requirement for all months.

### *External debt*

Brazil met the SDDS quarterly periodicity requirement for all quarters.

## **Timeliness**

15. Table 1 shows for each prescribed data category how well Brazil met the SDDS requirement for timeliness. To provide context, the table also shows the disseminated periodicity and indicates whether it exceeded the SDDS requirement.

16. As shown on the Summary of Observance at <http://dsbb.imf.org/Applications/web/sddsctycatsoolist?strcode=BRA>, Brazil used flexibility options for timeliness on the following:

- Analytical accounts of the banking sector
- General government or public sector operations

17. Brazil exceeded the SDDS timeliness requirements for<sup>5</sup>

- National accounts
- Production index
- Labor market: Employment
- Labor market: Unemployment
- Labor market: Wages/Earnings
- Price index: Consumer prices
- Price index: Producer prices
- Central government debt
- Balance of payments
- Official reserve assets
- Reserves template
- Merchandise trade
- International investment position

18. During 2007, Brazil met the SDDS requirements for timeliness for most of the data categories except for the following data categories

- Central government operations (long delay)
- Analytical accounts of the central bank (occasional long delays)

---

<sup>5</sup> Exceeds means that Brazil announced a dissemination lag that was better (shorter) than the one prescribed by the SDDS.

- Official reserve assets (occasional long delays)
- External debt (short delay)

### ***Reserves template***

Brazil met the monthly timeliness requirement for most months except in November *and* December (*no advance release date provided*), falling short of the SDDS one month timeliness requirement for this data category.

### ***External debt***

Brazil met the quarterly timeliness requirement for most quarters except in Q1 (*short delay*) and Q4 (*no advance release date provided*), falling short of the SDDS one quarter timeliness requirement for this data category.

## **B. Access Dimension Undertakings**

### **Advance Release Calendar**

19. During 2007, Brazil met the SDDS requirements for ARC in most months, except in December, and in the Second and Fourth quarters falling short of SDDS requirements. Without the expected release date in the ARC, the following data categories could not be monitored:

- Official reserves (November and December)
- Reserve template (November and December)
- International investment position (Second quarter)
- External debt (Fourth quarter)

### **Punctuality**

20. Table 2 shows for each prescribed data category how well Brazil met the SDDS requirements for punctuality against its ARC. To provide context, the table also shows the disseminated periodicity and indicates whether it exceeds the SDDS requirement. The table also shows Brazil's policy on release lags for each data category, as shown in its SDDS metadata.

21. During 2007, Brazil met the punctuality requirement for most of the data categories except for the following data categories

- Labor market: Wages/Earnings (short delay)
- General government or public sector operations (short delay)
- Central government operations (long delay)
- Central government debt (long delay)
- Analytical accounts of the banking sector (occasional long delays)
- Analytical accounts of the central bank (occasional long delays)

- Balance of payments (occasional short delays)
- Official reserve assets (long delay)
- Merchandise trade (short delay)
- International investment position (not disseminated in one reference quarter)
- External debt (occasional short delays)

### **C. Dissemination standards bulletin board undertakings**

#### **National summary data page**

22. Brazil displayed the SDDS-prescribed components on its NSDP or showed them via hyperlinks on webpages. Brazil posts on the NSDP the reference period of linked tables for the Data Template on International Reserves and Foreign Currency Liquidity, External Debt, and International Investment Position.

### **D. Integrity dimension undertakings**

#### **Metadata certification**

23. Table 3 shows for each prescribed data category how well Brazil met the SDDS timeliness requirements for quarterly certification of its metadata on the DSBB. The table also shows the timeliness of metadata updates if, at the time of quarterly certification, Brazil informed the staff the metadata posted on the DSBB was incorrect.
24. During 2007, Brazil met the SDDS requirements for certification for all quarters.

## **IV. DATA QUALITY DIMENSION UNDERTAKINGS**

25. During 2007, Brazil provided available information on the methodology, sources, and reconciliation of data categories in Data Quality Assessment Framework that would facilitate users to assess the quality of the data.
26. Brazil has not yet received a mission to produce a Data module of the Reports on Observance of Standards and Codes (data ROSC) through which the IMF assesses in detail the quality of the statistical systems of its member countries.

The Statistical Issues Appendix of the Article IV staff report of March 2006 has not yet been made public.

**Table 1. Brazil, 2007: Timeliness Against SDDS Requirements**

Unshaded cells reflect SDDS prescribed periodicity; entries in shaded cells reflect cases where SDDS prescribed periodicity is exceeded or where flexibility options are used.  
 √ – SDDS requirement met; × – data were not disseminated and/or no ARC release dates provided; negative numeric entry – number of days dissemination was later than timeliness requirement.
