

## Mauritius

### Annual Observance Report of the Special Data Dissemination Standard for 2012

#### I. INTRODUCTION

1. The IMF's work on data dissemination standards began in October 1995, when the Interim Committee (now the International Monetary and Financial Committee) endorsed the establishment by the IMF of standards to guide members in the dissemination to the public of their economic and financial data. The standards initially consisted of two tiers: the Special Data Dissemination Standard (SDDS) to guide countries that have, or that might seek, access to international capital markets, and the General Data Dissemination System (GDDS) to assist all other member countries build statistical capacity. The IMF Executive Board approved the SDDS in March 1996, and has since conducted periodic reviews of the SDDS, making changes to maintain relevance as developments warrant. The Executive Board authorized annual reports of subscribers' observance of their SDDS undertakings in March 1999 after the Second Review of the SDDS, which also implemented a requirement that subscribing countries disseminate a data template on international reserves and foreign currency liquidity. In February 2012, the IMF Executive Board approved the SDDS Plus as a third tier of the data standards initiatives. The SDDS Plus is open to all SDDS subscribers who can meet certain requirements on nine additional data categories beyond the SDDS.
2. This observance report is in three parts. Part II summarizes a subscriber's SDDS undertakings. Part III reviews the subscribing country's observance of SDDS requirements during the reference year, and Part IV provides information, as available, on the quality of the subscriber's statistical processes for compiling and disseminating the data.

#### II. SDDS UNDERTAKINGS

3. This report covers observance of the SDDS undertakings and it follows the legal text which is available at <http://www.imf.org/external/np/pp/eng/2012/090712.pdf>. These undertakings involve four metadata dimensions of the SDDS —data, access by the public, integrity, and quality—and public dissemination to the Dissemination Standards Bulletin Board (DSBB).
4. With regard to the data (Section II.1 and III.3 of the legal text) the SDDS requirements involve:
  - **Coverage:** Subject to the applicable “as relevant” coverage flexibility options allowed by the SDDS and exercised by the subscriber, subscribers must disseminate to the public all prescribed components of all prescribed data categories.<sup>1</sup> The observance report takes

---

<sup>1</sup> “As relevant” coverage flexibility may be available to a subscriber, subject to IMF staff approval, for components of the following categories:

Production index: Breakdowns by industrial, primary commodity, or sector, as relevant.

special note of the subscriber's coverage of the prescribed components for the data template on international reserves and foreign currency liquidity (reserves template) and for external debt.

- **Periodicity:** Subject to the periodicity flexibility options allowed by the SDDS and exercised by the subscriber, subscribers must release all prescribed components of all prescribed data categories with at least the prescribed periodicity. The observance report takes special note of the subscriber's observance of the periodicity requirements for the reserves template and for external debt.
- **Timeliness:** Subject to the timeliness flexibility options allowed by the SDDS and exercised by the subscriber, subscribers must release all prescribed components of all prescribed data categories with at least the prescribed timeliness. The observance report takes special note of the subscriber's observance of the timeliness requirements for the reserves template and for external debt. All timeliness information in this report is based on release dates detected from the national summary data page (see below) that the subscriber maintains.

5. With regard to data **Access by the public** dimension (Sections II.2 and III.3 of the legal text) SDDS requirements involve:

- **Advance release calendar (ARC):** Subscribers must disseminate an ARC for all prescribed components of all prescribed data categories (subject to the “as relevant” coverage flexibility options allowed by the SDDS and exercised by the subscriber, and data released with daily frequency), whether or not periodicity or timeliness flexibility options are taken, at least three months in advance of release.
  - ARCs are to be reported to the IMF covering a future period from three months to one year, with a frequency sufficient to provide release dates at least three calendar months in advance of the current date.
  - ARCs may be revised after dissemination but should provide the date of data release no later than the Friday preceding the day of release.
  - ARCs must be reported in an electronic format the IMF determines.
  - This observance report refers to timeliness against the ARC as “punctuality” to distinguish it from timeliness against SDDS requirements. *All punctuality information in this report is based on release dates detected from the national summary data page (see below) that the subscriber maintains and the ARC the subscriber reports to the IMF.*

---

Labor market: Employment, unemployment, and wages/earnings, as relevant.

Central government debt: Breakdowns by domestic and foreign holders, as relevant, with a breakdown by currency (including indexed), as relevant, and a breakdown by maturity; debt guaranteed by central government, as relevant.

Stock market: Share price index, as relevant.

Exchange rates: Spot rates and three- and six-month forward market rates, as relevant.

6. With regard to the **Integrity Dimension** (Section III.2 of the legal text), SDDS requirements involve:
  - **Metadata certification:** Subscribers are required to certify, on an annual basis, the accuracy of the metadata posted on the DSBB. Under this process, subscribers will notify the IMF staff, within one month after the end of each calendar year, that either: (1) all of the metadata posted on the DSBB are fully accurate; or (2) certain metadata are inaccurate. In the latter case, subscribers would need to provide the corrected metadata together with the annual certification. The metadata posted on the DSBB include:
    - The ARC.
    - Descriptions of compilation and dissemination practices for the Data, Access by the Public, Integrity, and Quality dimensions, for each data category the SDDS prescribes, subject to any “as relevant” coverage flexibility options allowed by the SDDS and exercised by the subscriber.
    - User contact and data release formats information.
7. The SDDS undertakings concerning the quality dimension of data are outlined in Section IV below.
8. Staff will monitor regularly the observance by subscribers of the requirements of the SDDS to determine whether any deviations arise. If deviations arise, staff will assess them and determine the nature and extent of the deviation. Serious deviations from SDDS undertakings will be addressed in accordance with the SDDS nonobservance procedures in Section III.4.
9. The SDDS requires public dissemination of data on the **DSBB** (Section III.2 of the legal text):
  - **National summary data page (NSDP):** Subscribers must post a table on a national webpage to which the DSBB is linked containing for all prescribed components of all prescribed data categories (subject to coverage flexibility options allowed by the SDDS and exercised by the subscriber) the reference period of the latest release and the value of the latest and most recent previous releases. The NSDP should also contain hyperlinks to longer time series and more detailed data.
  - **NSDPs** must follow format and layout requirements determined by the IMF that allow the IMF staff to detect releases by electronically scanning the NSDP.

- Among these electronic monitoring requirements, for the prescribed data template on international reserves and foreign currency liquidity, as well as the table on external debt, the NSDP may link to another electronic document containing a table with the prescribed components; however, the NSDP must contain the reference period of the table that contains the current release and is the target of such a link.

### III. OBSERVANCE OF THE SDDS BY MAURITIUS DURING 2012

10. Mauritius subscribed to the SDDS on February 28, 2012 and met all SDDS requirements at the time of subscription. The Summary of Observance table<sup>2</sup> on the DSBB shows Mauritius' dissemination policy concerning periodicity and timeliness of SDDS prescribed data categories and their components, as well as the flexibility options allowed under the SDDS that it has exercised, if any. According to the Summary of Observance, these policies have been in observance of the SDDS since the time of subscription. The following sections review Mauritius' dissemination practices against SDDS requirements in 2012.

#### A. Data Dimension Undertakings

##### Coverage

11. Mauritius took no "as relevant" coverage flexibility options.
12. During 2012, Mauritius met the SDDS requirements for coverage for all data categories.

##### *Reserves template*

Mauritius disseminated all of the prescribed components for the reserves template.

##### *External debt*

Mauritius disseminated all of the prescribed components for the external debt template.

##### Periodicity

13. As shown on the Summary of Observance at <http://dsbb.imf.org/Applications/web/sddsctycatsoolist?strcode=MUS>, Mauritius used flexibility options for periodicity on the following:

- Production index
- Price index: Producer prices

14. During 2012, Mauritius met the SDDS periodicity requirements for all data categories.

##### *Reserves template*

Mauritius met the SDDS monthly periodicity requirement for all months.

##### *External debt*

---

<sup>2</sup> <http://dsbb.imf.org/Applications/web/sddsctycatsoolist?strcode=MUS>

Mauritius met the SDDS quarterly periodicity requirement for all quarters.

### **Timeliness**

15. Table 1 shows for each prescribed data category how well Mauritius met the SDDS requirement for timeliness. To provide context, the table also shows the disseminated periodicity and indicates whether it exceeded the SDDS requirement.
16. As shown on the Summary of Observance at <http://dsbb.imf.org/Applications/web/sddsctycatsoolist?strcode=MUS>, Mauritius used flexibility options for timeliness on the following:
  - Production index
  - Price index: Producer prices
17. Mauritius exceeded the SDDS timeliness requirements for:<sup>3</sup>
  - Price index: Consumer prices
  - Central government debt
  - Merchandise trade
  - External debt
18. During 2012, Mauritius met the SDDS requirements for timeliness for all data categories.

#### ***Reserves template***

Mauritius met the monthly timeliness requirement for all months.

#### ***External debt***

Mauritius met the quarterly timeliness requirement for all quarters.

## **B. Access Dimension Undertakings**

### **Advance release calendar**

19. During 2012, Mauritius met the SDDS requirements for ARC in all months.

### **Punctuality**

---

<sup>3</sup> Exceeds means that Mauritius announced a dissemination lag that was better (shorter) than the one prescribed by the SDDS.

20. Table 2 shows for each prescribed data category how well Mauritius met the SDDS requirements for punctuality against its ARC. To provide context, the table also shows the disseminated periodicity and indicates whether it exceeds the SDDS requirement. The table also shows Mauritius' policy on release lags for each data category, as shown in its SDDS metadata.
21. During 2012, Mauritius met the punctuality requirement for all data categories.

### **C. Dissemination standards bulletin board undertakings**

#### **National summary data page**

22. Mauritius displayed the SDDS-prescribed components on its NSDP or showed them via hyperlinks on webpages,. Mauritius posts on the NSDP the reference period of linked tables for the Data Template on International Reserves and Foreign Currency Liquidity.

### **D. Integrity dimension undertakings**

#### **Metadata certification**

23. Table 3 shows for each prescribed data category how well Mauritius met the SDDS timeliness requirements for annual certification of its metadata on the DSBB. The table also shows the last date when Mauritius certified its metadata.
24. Mauritius met the SDDS certification requirements for 2012 for all data categories.

## **IV. DATA QUALITY DIMENSION UNDERTAKINGS**

25. During 2012, Mauritius provided available information on the methodology, sources, and reconciliation of data categories in Data Quality Assessment Framework that would facilitate users to assess the quality of the data.
26. Mauritius has received a mission to produce a Data module of the Reports on Observance of Standards and Codes (data ROSC) through which the IMF assesses in detail the quality of the statistical systems of its member countries, in 2007. A full report may be found at: [www.imf.org/external/pubs/ft/scr/2008/cr08277.pdf](http://www.imf.org/external/pubs/ft/scr/2008/cr08277.pdf).
27. The Statistical Appendix of the Article IV staff report of March 2012 (<http://www.imf.org/external/pubs/cat/longres.aspx?sk=25797.0>) stated that: “Data provision is adequate for surveillance”.

**Table 1. Mauritius, 2012: Timeliness Against SDDS Requirements**

Unshaded cells reflect SDDS prescribed periodicity; entries in shaded cells reflect cases where SDDS prescribed periodicity is exceeded or where flexibility options are used.  
 √ – SDDS requirement met; × – data were not disseminated; O – no ARC release dates provided; P – pending release; negative numeric entry – number of days dissemination was later than timeliness requirement; S – next to an observation indicates release related to semi-annual data.
